

ENSE 374, Milestone 2

• • •

ECARE

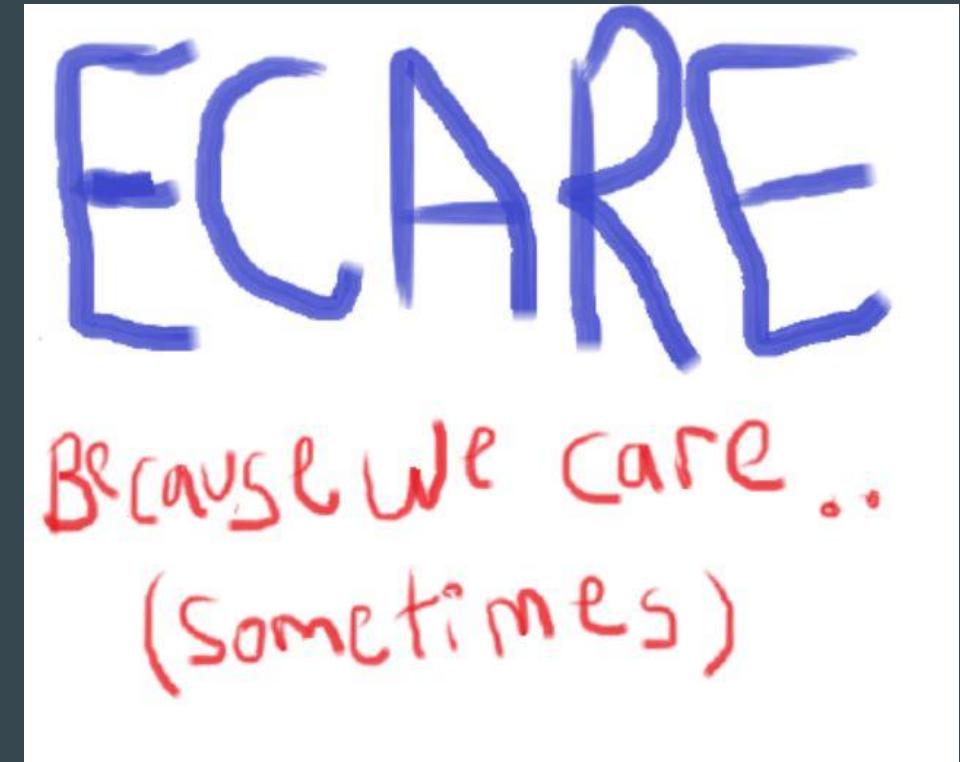

Daris Lychuk, Legbo Menegbo, Glaiza Regonas, Han Gao,
Shafiq Zainuddin, James, Mfonisoabasi

October 11th, 2018

Team introductions

- Shafiq Zainuddin 4th year SSE student
- Legbo Menegbo CS/Business student
- Han Gao 4th year SSE student
- James Mfonisoabasi 4th year SSE Student
- Glaiza Regonas 4th year SSE student
- Daris Lychuk 4th year SSE student

- **What's your team name?**
- ECARE “Because we care....(sometimes)”

Welcome to the Faculty of Engineering and Applied Science

Engineering and the applied sciences represent a rewarding area of study that blends creativity and imagination with the science and mathematics of design and problem solving and the human factors of personnel and resource management, planning, and organization. If you're interested in designing solutions to life's problems, big or small, then engineering just might be the program for you!

On our website, you'll find answers to questions like: What is engineering? What classes should I take in high school? How do I register for classes? What programs are offered? What sort of career can I have? What else can I get involved in as an engineering student? What is accreditation and are U of R's Engineering programs accredited?...and many others. Please, browse our website for answers to all these questions and more. Also, if you'd like to speak to someone about our programs or other questions, feel free to [contact us](#).

New Spring Office Hours
May-August
Monday-Wednesday-Thursday-Friday
9:00-12:00 and 1:00-4:00

Tuesday's we will open at 10:00

[Programs](#) | [Students](#) | [Faculty and Staff Directory](#) | [Contact Us](#)

[Engineering Home](#) > [Programs](#)

Programs

[Electronic Systems Engineering \(ESE\)](#) >

[Electronic Systems Engineering](#)

Design information and communication systems using electronics and computers.

[Environmental Systems Engineering \(EVSE\)](#) >

[Environmental Systems Engineering](#)

Address environmental issues with water, transportation, industry, and waste management.

[Industrial Systems Engineering \(ISE\)](#) >

[Industrial Systems Engineering](#)

Organize and utilize the total resources of modern manufacturing and process industries.

[Petroleum Systems Engineering \(PSE\)](#) >

[Petroleum Systems Engineering](#)

Manage and evaluate oil and gas reserves and design production systems.

[Software Systems Engineering \(SSE\)](#) >

[Software Systems Engineering](#)

Analyze and develop operational, management, and information software systems.

[Process Systems Engineering \(PSEng\)](#) >

[Process Systems Engineering \(Graduate Program\)](#)

Process design for the purpose of converting raw goods to usable end products (Graduate Program only).

Removal of content proposals

- Highlight the content your team has proposed for removal from the public site as being deemed for faculty/staff awareness/eyes only
 - In the end, our team seems to believe that everything available on the website right now should be available to students, parents, and staff/faculty.
- The Reason
 - We think this is best due to if any students and/or parents, come across any problems accessing or finding certain information, by allowing the staff to have access to these pages, they can help guide them easier, because they would know the navigation of the website best. There also does not seem to be any information that would be deemed unsuitable for student/parent eyes.
- Removal
 - Multiple broken links, such as, “News & Events” on the home page seems to be broken however, 404 error
 - Redundant sub-categories, like “Scholarship” under Students which is also in “Student Resources”

Group reflection

- How did you feel about this milestone? What did you like about it? What did you dislike?
 - Keeping us on track (“It’s getting tough!”)
 - We enjoyed to go through each page as the user, seeing what was truly necessary and what needs improvement.
 - We are not fond of going through each page as the user, seeing what was truly necessary and what needs improvement.

Group reflection(Cont.)

- What did you learn about yourself as you collaborated and worked through this milestone?
 - As a group we learned that we have fairly similar ideas on how to improve the website(due to individually critiquing each page).
 - Teamwork and Individual efforts
 - “Cooperation is the thorough conviction that nobody can get there unless everybody gets there” ~ Virginia Burden

You get a taco!

Group reflection(Cont.)

- How will you use what you have learned going forward?
 - Going forward we will attempt to make the majority of the pages more user friendly as well as interactive with the user.
 - Notes and Documentation
- What “stuff & things” related to this milestone would you want help with?
 - Opinions and criticism from others on the choices our group brought to attention
 - Clarification
